€62.99 10 / 15 Boeing 747-400 Model The most iconic silhouette in aviation. PMDG is proud to present a new simulation of the Queen of the Skies - the Boeing 747-400. Developed over three years in a collaboration between Boeing and PMDG, this 747-400 is faithful to the original with a unique interior and exterior. FEATURES Open cockpits. Virtual, user-adjustable controls. One of the best flight-simulation engines. Airliner taxi and takeoff sequences. Color and location cues. Flightline, fuel load, and weather. Pressurized cabin. Checklists and flight plans. Realistic landing gear and landing animations. Physics engine. Adjustable noise parameters for current weather. Ambient sounds (for 3-channel surround sound). Retractable boarding stairs and baggage compartments. Customize and save your aircraft for future flights. Built-in support for the most popular real-world engines. Coming in February. This product is included as a FREE Update within the PMDG Suite! The PMDG 737 series is a long-range narrowbody that has been a genuine best seller among PMDG customers. The 737-800 variant offers a long-range

cruise of 10,500km at an economical burn rate of only 1,200kg / 6,600lb / hour. This new version has been further improved thanks to the direct involvement of Boeing and offers unique features: The standard-issue 737-800 cabin offers a retractable cargo door and adjustable seating, while the extended-range version features a separate lavatory and additional aisles. The 737 NGX (new generation, extended range) is a pure-play, stretched 787 variant with a performance and economics tailored to regional markets. Ph 82157476af
